

Business Intelligence Developer/Analyst

Company: eshots, Inc, the leading interactive event marketing company, delivers event technologies for all phases of the event lifecycle. The eshots Event Lifecycle Suite is an integrated set of products that allow clients to activate their event, capture consumer data, and measure event success. Our platform is used at events including the Super Bowl, MLB, NASCAR, College Football, Auto Shows, Ride and Drives, and Concerts.

Job Location: Chicago, IL

The Business Intelligence Developer/Analyst will be a member of the development team implementing new reporting solutions and supporting existing reporting systems. This experienced professional will be a key component of the deployment of the next generation of our internal and client facing data analysis and reporting solutions. Our BI platform is a fundamental component of transforming the data collected with our various event activation and data collection systems into event metrics, performance measurement and benchmarking that measure and validate event performance and marketing effectiveness. The metrics developed will be presented in event performance dashboards, displayed as reports available to both internal consumers and external customers.
