

Application Developer

Company: eshots, Inc, the leading interactive event marketing company, delivers event technologies to attract and capture leads at events. Our platform is used at a number of different events including Super Bowl, MLB, NASCAR, college football, auto shows, ride and drives, and concerts.

Job Location: Chicago, IL

Job Description: eshots, Inc. is experiencing growth and seeking a talented application developer with an entrepreneurial spirit. In this role you will be responsible for developing applications that define and support our suite of services.

The ideal candidate is detail-oriented and has excellent problem-solving and analytical abilities, good communication skills and ability to work independently and as part of a team. The application developer will be a seasoned professional with 3-4 years of experience developing various applications. In addition they will have experience in team-based software development and effective project management processes and tools. The candidate should be comfortable in an entrepreneurial environment and working with a dynamic, collaborative development team. We are seeking an individual looking for a new challenge at a smaller, rapidly growing company, where they can have a large impact.

Responsibilities:

- Participate and consult on software related functional and technical requirements, and provide specific recommendations
- Responsible for confirming requirements, developing and testing code, and managing product deliverables to targeted release dates
- Coordinate with QA team to effectively test software releases
- Perform rotating technical support role once every 4-5 weeks, which requires answering client calls during technical support hours (including weekends).
- Travel occasionally to assist at events.
- Contribute creative ideas to the R&D team to improve eshots' product suite.

Minimum Requirements

- BS/BA in Computer Science, or related field or equivalent work experience
- Above average SQL knowledge
- 3-4 years experience within a Microsoft Development Environment using VB, Visual C#, and .Net
- Web development – HTML + scripting
- Comfortable working and learning new technologies on the job
- Ability to multi-task on various projects at the same time
- A strong grounding in object-oriented design and development techniques.
- Experience with all phases of the software development life cycle.
- Excellent combination of technical and interpersonal skills.
- Experience with the following technologies are a plus: Java, Flash/Flex/ActionScript, Visual Studio 2008

Benefits:

- Salary plus bonus
- Health Insurance and 401K Benefits
- Casual work environment
